

Math 171 A
Analytic Geometry and Calculus II
Spring 2008

Instructor: Fred Schultheis

Office: PPHAC 218

Phone: 610-625-7887

Office Hours: MW 1:30-3:00 pm, and by appointment.

Required Text: Calculus: Early Transcendentals Single Variable, James Stewart, sixth edition

Email: mefbs01@moravian.edu

Course Goals and Content:

In this course you will be continuing your study of the mathematics of infinite processes. We will study advanced integration, elementary differential equations, and infinite sequences and series. You should gain

- a mastery over basic techniques of integration
- deeper insight into the power of calculus as a tool for modeling real world situations
- further expertise in using Maple as a tool for problem solving

The main content of the course is contained in Chapters 5–11 of the text.

Course Description

The course meets MWF period 2b (8:50-10:00 am) in PPHAC 113. Homework assignments will be given at each class meeting. Students are expected to complete these assignments by the next class meeting, where they will be discussed. No one can learn mathematics without doing it themselves and so, **to the student, homework is the most important part of the course.** Since class participation is important, students are expected to attend every class.

Grading

Your final grade will be based on weekly quizzes (100 points), class participation (50 points), Maple projects (about 100 points), 3 hourly exams (100 points each), and a comprehensive final exam (150-200 points). Exams may be in-class, take-home, or a combination of the two. The following grading scale is used for assigning your final grade.

		87 – 89	<i>B+</i>	77 – 79	<i>C+</i>	67 – 69	<i>D+</i>	≤ 59	<i>F</i>
93 – 100	<i>A</i>	83 – 86	<i>B</i>	73 – 76	<i>C</i>	63 – 66	<i>D</i>		
90 – 92	<i>A–</i>	80 – 82	<i>B–</i>	70 – 72	<i>C–</i>	60 – 62	<i>D–</i>		

Attendance

Class attendance is required. You will lose 20% from your class participation grade for each unexcused absence. If you are sleeping in class, you are not there. If you feel the need to leave class before it is over, even if you come back, you are not there. In other words, in any of these cases you will be considered absent and will lose 20% of your class participation grade. You are responsible for all work covered in class and all assignments, even if absent from class. If you must miss more than one class due to illness or emergency, you should notify the instructor. **There will be no make-up for missed quizzes. Make-up tests are given only in extreme cases. If a student has to miss a test it is the student's responsibility to contact the instructor as early as possible.**

ACADEMIC HONESTY POLICY GUIDELINES

MATHEMATICS COURSES

The Mathematics and Computer Science Department supports and is governed by the Academic Honesty Policy of Moravian College as stated in the Moravian College Student Handbook (pp. 52-57). The following statements will help clarify the policies of members of the Mathematics faculty.

In all homework assignments which are to be graded, you may use your class notes and any books or library sources. When you use the ideas or thoughts of others, however, you must acknowledge the source. For graded homework assignments, you may not use a solution manual or the help, orally or in written form, of an individual other than your instructor. If you receive help from anyone other than your instructor or if you fail to reference your sources you will be violating the Academic Honesty Policy of Moravian College. For homework which is not to be graded, if you choose, you may work with your fellow students. You are responsible for understanding and being able to explain the solution of all assigned problems, both graded and ungraded.
