Moravian College Department of Biological Sciences

Neuroscience - BIO 362 Fall 2008

Instructor: Dr. Cecilia M. Fox

Phone: 610-861-1426

E-mail: cfox@moravian.edu

Office: Collier Science Room 304

Office Hours: Mondays and Wednesdays 10am-12pm, Thursdays 11:30am-12:30pm

and by appointment

Lecture: Tuesdays and Thursdays 10:20-11:30am

PPHAC 301

Lab: Mondays 12:45-3:45pm

Collier Hall of Science, Room 303

Required Textbook: Neuroscience: Exploring the Brain – 3rd edition

By Mark F. Bear, Barry W. Connors and Michael A. Paradiso

Lippincott Williams and Wilkins

<u>Course Description</u>: The study of neuroanatomy, neurophysiology and neuropathology; special emphasis on the functional aspect of brain organization; introduction to theories and research advances in the field of neuroscience will be presented through journal club and "Neuroscience in the News" activities. Laboratory includes gross anatomy and microscopic study of the central nervous system, computer assisted neurophysiology experimentation, computerized and radiographic study of the brain and a semester long behavior project.

Course Objectives: Upon completion of this course the student will be able to:

- 1) identify and discuss neuroanatomical structures and their related functions
- 2) appreciate the interrelationships among neurological structures
- 3) understand the various means through which neural transmission of information is achieved
- 4) realize the interrelationships among the central nervous system, peripheral nervous system and musculoskeletal system
- 5) become familiar with various imaging techniques in studying and identifying structures of the central and peripheral nervous systems
- 6) effectively discuss current advances in scientific research regarding various areas in neuroscience through journal club and "Neuroscience in the news" activities
- 7) understand and discuss the symptoms, pathology, current therapies and research regarding neurodegenerative diseases such as Parkinson's disease, Alzheimer's disease and ALS

<u>Grading:</u> The grading system is as follows: (+/- will be administered as the professor deems appropriate)

A = 90 - 100

B = 80 - 89

C = 70 - 79

D = 60 - 69

Course Requirements: The student's grade will be based on the following:

Three written lecture exams 100 points each Two laboratory exams 100 points each

Journal club and "Neuroscience in the News" 100 points

presentation / participation

Neurotransmitter presentation 100 points
Behavior Experiment 100 points
Comprehensive final exam 200 points
1000 points

- ** Both lecture material and reading assignments are fair game for lecture exams.
- ** 1/3 of each exam will contain material from previous exams.
- ** The final lecture exam is cumulative.
- ** The "presentation / participation grade" is based on your participation during the journal club and "news" discussions, preparation for discussion and quality of presentation.
- ** The presentations and behavior experiment will be discussed once the course is in progress.

Expectations:

- a) <u>Attendance</u>: Regular lecture and lab attendance is expected. <u>No</u> make-up exams will be given unless you have an acceptable reason (family emergency, illness, etc). If an emergency should arise, you must notify me <u>prior to</u> the exam and <u>not</u> after. If you plan to miss lab please notify me in advance.
- b) <u>Cheating:</u> will not be tolerated. Students will be held to the highest standards as specified by the Moravian College Honor Code. Violations of this code will be handled in the most severe manner allowed by university policy.
- c) Reading Assignments: should be completed prior to lecture as well as lab.
- d) <u>Neuroscience in the News:</u> Each student will present some new information in the field of Neuroscience that has been mentioned in the news that week. A schedule of presentations will be posted on Blackboard once the semester begins. <u>Presentations will be on Thursdays.</u>
- e) Extra Help: If difficulties interpreting lecture or lab material arise, please contact me regarding tutoring sessions. *I will be more than happy to help!!*
- f) <u>Cell Phones/Pagers</u>: Please either turn off or set on vibrate/quiet mode your cell phones and pagers prior to entering the lecture hall and laboratory. As a courtesy to the professor, no text messaging during lecture and lab!

^{*} I look forward to introducing the field of Neuroscience to you. Best wishes for a great semester!

Lecture Schedule

Week of:	<u>Topic</u>	Reading Assignment		
Aug. 25	Introduction to Neuroscience	Chapter 1		
Sept. 1	No Class (Labor Day)			
Sept. 1	Neurons and Glia	Chapter 2		
Sept. 8	Resting Membrane and Action Potentials	Chapters 3, 4		
Sept. 15	Synaptic Transmission and Neurotransmitter Systems	Chapters 5, 6		
Sept. 22	Structure of the Nervous System	Chapter 7		
Sept. 29	Structure of the Nervous System (con't)			
Sept. 30	Exam 1			
Oct. 4-7	Fall Break			
Oct. 6	Cranial Nerves and Chemical Senses	Chapter 8		
Oct. 13	Somatic Sensory System	Chapter 12		
Oct. 20	Spinal Control of Movement	Chapter 13		
Oct. 27	Chemical Control of Brain and Behavior	Chapter 15		
Oct. 28	Exam 2			
Nov. 3	Sex and the Brain	Chapter 17		
Nov. 10	Rhythms of the Brain	Chapter 19		
Nov. 17	No class - Society for Neuroscience Conference			
Nov. 25 & Dec. 1	Brain Mechanisms of Emotion	Chapter 18		
Nov. 26-30	Thanksgiving Holiday			
Dec. 2	Exam 3			
Dec. 10	The Aging Brain			
Dec. 12-19	Final Exams			

Preliminary Laboratory Schedule

<u>Lab</u>	<u>Topic</u>		
Sept. 1	No Lab - (Labor Day)		
Sept. 8	Library Instruction Session - meet in Reeves Library at 12:45pm		
Sept. 15	Neuroscience Abstract Writing Exercise Microscopic Study of the Nervous System Physio Ex. Neurophysiology of Nerve Impulses		
Sept. 22	Behavior Experiment - Positive Reinforcement		
Sept. 29	Gross Anatomy of the Brain, Spinal Cord and Skull; Radiographs Journal Club Presentation: Group 1		
Oct. 6	No Lab - Fall Break		
Oct. 13	Cranial Nerve Testing		
Oct. 20	Exam 1		
Oct. 27	Introduction to Biopac Software Reflex Testing; Biopac – Reaction Time Journal Club Presentation: Group 2		
Nov. 3	Sex and the Brain: Brain gender exercises Biopac: GSR and Polygraph		
Nov. 10	Biopac: EEG 1 and 2 Journal Club Presentation: Group 3		
Nov. 17	No lab - Society for Neuroscience Conference		
Nov. 24	Exam 2		
Dec. 1	Behavior Experiment Presentations		
Dec. 8	Translational Neuroscience: Activity Design Final Exam Review		

^{*}Professor reserves the right to amend this syllabus as the course progresses*
