

# Moravian College

Technology In the Classroom (EDUC 240.2)

## SYLLABUS

### Fall 2009

Tuesday / Thursday - Section A (1:10 - 3:10)

Wednesday / Friday - Section C (10:20 - 12:20)

### Instructor Information

Instructor: Mr. Ronald J. Szabo

Office Hours: Before or after class or by Appointment

email: merjs02@moravian.edu

Home: 610-867-8989

Office: 610-625-7986

### Text

Schwartz, Steve, *Microsoft Office 2008 Visual Quickstart Guide*, California: Peachpit Press, 2008.

### Course Description

The use of educational technology in the elementary and secondary classroom continues to grow and develop. Students are coming to classes with more knowledge and expertise in the use of computers and various applications. This course is designed to reinforce and expand on previously learned skills that are still applicable to the teaching / learning process as well as to explore some of the newer technologies that have been recently introduced in an effort to better integrate technology into instructional planning and effective communication.

### Course Goals

- To master advanced techniques of word processing software.
- To learn how to use various types of graphic, sound and video elements in documents and presentations
- To learn how to effectively use the Internet as part of classroom instruction.
- To develop a presentation for individualized instruction.
- To explore various ways technology can be used in the classroom.
- To develop and publish an educational web site.

### Course Requirements

- Because of the relative few classes that this course meets, attendance at all classes and active participation in discussions is critical. Call or email prior to class, if you are going to be absent. Only illness or emergency will be accepted as an excused absence. If you are not sure, contact me prior to the class that will be missed. If you should miss more than two (2) classes, for any reason, it is strongly advised that you consider dropping the class. Missing any class without prior notification will lower your final grade by a half grade per absence (i.e. an A will be an A-). Arriving late or leaving early will also be noted.
- Participation will be evaluated based on your presentations, preparedness for class, neatness and thoroughness in assignments and ability to contribute to discussions. You will be expected to be able to demonstrate techniques and principles taught in class.
- Successful completion of all assignments and major projects.
- Assignments are designed to reinforce and practice skills taught in class. Assignments will be handed in electronically when necessary or printed. Assignments are to be posted electronically 1 hour before class, if possible

- Projects -
  - Create a technology fact sheet with multi column format and graphics
  - Create a multimedia presentation suitable for use as a learning center
  - Create and publish a professional website
- Complete and submit all work and projects on time. Grades will be lowered for lateness. Class work and assignments missed because of excused absences must be made up. It is the responsibility of the student to obtain assignments and complete them within a week of the absence. Work missed for an unexcused absence cannot be made up.
- Demonstrate through testing and/or presentations, a good understanding of how technology can be used in the classroom.
- Tests: Will be announced as needed.

#### Assessment

This class is designed for you to master basic computer skills in the area of word processing, digital and video imagery and web page construction. Classroom experiences have been designed to reinforce and use skills taught in class. Upon evaluation, if the skills appear not to have been mastered, you may resubmit an assignment to demonstrate your level of skill has improved. Both the original and the resubmitted assignment will be taken into consideration as far as overall assessment. Assignments and/or projects with grades that are lowered because of proofreading, spelling or grammatical errors may NOT be resubmitted.

All assignments will be evaluated based on how it functions on a MacIntosh computer similar to those computers in the lab. Web sites must be created using the web design program taught in class and will be evaluated by viewing the site over the Internet.

1. Class Participation - 10%
2. Assignments - are assessed as either being completed: at, below or above expected demonstrated knowledge of skill. Any assignment assessed as below expected performance may be resubmitted for reevaluation. - 15%
3. Major Projects
  - Technology Fact Sheet - 20%
  - Learning Center Presentation - 25%
  - Web site - 30%

Projects may not be resubmitted for re-evaluation.

Both subjective and objective evaluations will be used to determine final class grades.

#### Grading:

- A= Your work is outstanding and done with little outside assistance. It goes beyond requirements and shows perception and insightfulness. All students will be able to earn an "A" if they care to, but not everyone will endeavor to put forth the extra effort and time.
- B= You go beyond the requirements enhancing your work by incorporating previously learned techniques into basic assignments.
- C= You meet all requirements adequately.
- D= You demonstrated less than adequate mastery of the course content and applicable computer skills.
- F= You failed to demonstrate a basic understanding of the topics and concepts taught. Work was missing or excessive absences were noted.

Grades are calculated by applying the following point value to each A=10, A-=9, B+=8, B=7, B-=6, C+=5, C=4 C-=3, D+=2, D=1 Then multiplying by the percentage stated above.

	Class Participation	Assignments	Fact Sheet	Learning Center	Web Site	Total
Percentage	10	15	20	25	30	100
Student	10	10	8	10	9	
Weight	1	1.5	1.6	2.6	2.7	9.3

Total Weighted Grade 9.3 converted Grade: A-

Final grades are calculated by summing the point values and then converted into the following range distribution.

A = 9.5 - 10	C+ = 4.5 - 5.49
A- = 8.5 - 9.49	C = 3.5 - 4.49
B+ = 7.5 - 8.49	C- = 2.5 - 3.49
B = 6.5 - 7.49	D+ = 1.5 - 2.49
B- = 5.5 - 6.49	D- = .5 - 1.49

### Other Information

Academic Honesty - Moravian's Academic Honesty Policy will be followed as stated in the Student Handbook. Failure to follow these guidelines may result in failing this course.

Snow days - Listen to the radio or television for information on college closings.

Class Cell phone, and messaging policy: Students may not text, check email, and/or take phone calls during class. All cell phone and audible paging, and /or messaging equipment must be deactivated during class. Checking email, texting, or using any social networking web sites is also prohibited. Violations will be noted and will have an impact on your final grade.

Expected Work Load - For this course, it is expected that you will work between 4 - 6 hours outside of class in preparation and study.

Education Office Hours - Every evening, but Friday, Saturday, and Sunday, the education is located on the third floor of the Academic Building. The office is open until 6:00 PM
