

Education 364Z: Curriculum and Instruction In Science
Moravian College
Fall, 2009

Instructor: Steven Weiss

Home Phone: 610-351-8353

Cell: 610-751-7985

E-mail: weiss@nwlehighsd.org

Work Phone: 610-298-

8661

(Select High School Option)

Office Hours: By appointment; before or after class

Course Meeting Time: Independent Study - Times TBA

Course Objectives: Each student will ...

- Synthesize a personal rationale and philosophy for teaching science.
- Infuse inquiry and constructivist practices in their teaching.
- Demonstrate mastery and application of Pennsylvania Department of Education Academic Standards for
 - Science and Technology
 - Environment and Ecologyin order to prepare their future students for the upcoming S.T.E.E. P.S.S.A. assessment.
- Make instructional modifications for students with learning disabilities and English language learners in planning and practice.
- Practice the activities of teaching: unit design, lesson planning, instruction, questioning, evaluating texts, assessing student learning, and reflection. Also...
- utilize, practice, and demonstrate varied, effective teaching methods in both the college and field experience settings.
- Reflect on their effectiveness as an educator.
- Incorporate technology into planning and in classroom instruction.
- Observe and evaluate current classroom practice and interact professionally with secondary students and fellow educators.

- Analyze and become familiar with resources (professional organizations and professional journals) for secondary science teachers.
- Demonstrate the essentials of laboratory safety and classroom management.
- Discuss and analyze current trends in science education.
- Research and employ science area-specific pedagogy.
- Prepare for the interview process.
- Prepare for student teaching and to become professional science educators.

Required Texts: Trowbridge, L.W., Bybee, R.W., Powell, J.C. *Teaching Secondary School Science, Eighth Edition*. 2004. Pearson/Merrill/Prentice Hall.

Kwan, T., Texley, J., Summers, S. *Investigating Safely: A Guide For High School Science Teachers*. 2004. NSTA Press.

Colburn, Alan. *Lingo Of Learning – 88 Educational Terms Every Science Teacher Should Know*. 2003. NSTA Press.

* Other readings will be required from handouts and journals.

Attendance: The success of this class relies heavily on the full participation of all its members. A large part of this class depends greatly on your class discussions and presentations. Of course, illness and emergencies arise and are unavoidable. If you cannot attend class for a valid reason, please call me. You are responsible for finding out what you missed from the other class members. It is your responsibility to consult the course schedule for the due dates of assignments. Since class participation is dependent on your attendance, your grade may be affected by absences. More than two absences may jeopardize the passing of the course. The instructor reserves the right to determine the conditions upon which late work may be submitted and graded.

Academic Honesty Policy: Please refer to the Student Handbook for this college policy.

Grading: Your final grade is calculated as follows:

Lessons, Assignments & Quizzes: 40%

Portfolio & Unit Plan: 25%

Field Experience & Field Journal: 25%

Participation: 10%

* Please note: It is within the instructor's purview to apply qualitative judgment in determining grades for an assignment or for a course *

Students with Disabilities: If you need accommodations in this class, please contact the Learning Services Office as soon as possible to enhance the likelihood that such accommodations are implemented in a timely fashion.

Work Requirement: Students should expect to work 3 or more hours per week outside of class and field experience.

Disclaimer: This syllabus is subject to change

LESSONS

- **1 Micro-Lesson:** Present a lesson that takes about twenty minutes. A lesson plan must be written using the format found on page 17 (Activity 1-3.) A short self-critique, using the criteria on page 18 (Activity 1-3), will be due the following class meeting.
- **1 Laboratory-Driven Lesson:** 40 minutes long. Lesson plan follows Moravian College format; turn in before you deliver the lesson. Self-critique due by the next class.
- **1 Classroom Activity-Driven Lesson:** 40 minutes long. Lesson plan follows Moravian College format; turn in before you deliver the lesson. Self-critique due by the next class.
- **1 Internet-Assisted Lesson:** 40 minutes long. Lesson plan follows Moravian College format; turn in before you deliver the lesson. Self-critique due by the next class.
- **1 Current Event-Driven Lesson:** 40 minutes long. Lesson plan follows Moravian College format; turn in before you deliver the lesson. Self-critique due by the next class.

- **1 Videotaped Lesson From Field Experience:** 40 minutes long. Lesson plan follows Moravian College format; turn in the evening we will observe. Self-critique due by the next class.

** We will be discussing your lessons upon their completions as a class.

ASSIGNMENTS

- **Textbook Activities:** Simple, reflective tasks from our required textbooks which are discussed in groups and by the entire class when we meet.
- **Discussion Case Studies:** From your field experience. See “Field Experience Journal” section – bulleted items.
- **Personal Mission Statement & Philosophy:** In a previous course, you may have written a general philosophy statement on teaching. For this activity, you will concentrate specifically on science teaching and your specific discipline. Kids, invariably will ask you “Why is this stuff important?” Well, you will need to answer their question quickly and convincingly! So, prepare yourself now! Address questions like: What is your personal definition of science? Why do you want to teach science? Why is it important? Why is your discipline important? What are your goals in science teaching? Why do kids need to be scientifically literate? What will kids get out of your class? How will kids master the PA Standards? One page will be sufficed.
- **3 Journal Article Critiques:** After reading an article, write a brief reaction in which you address the following:
 - Why did you choose this article?

- Why was the article written? For whom?
- What information was valuable to you?
- What will the students learn? Why is this important?
- Are the strategies appropriate and effective?
- What would you change?

Attach a copy of the article to the critique and be prepared to discuss it with the class that evening.

****Two articles must be from *The Science Teacher*. The other will be from journals in your science discipline. One critique must be of an article that does not involve a specific classroom activity.**

- **1 Cookbook Conversion Lab Activity:** Find a “cookbook” lab exercise and (as Emeril would say) “Kick it up a notch.” Transform this mundane lab into an exercise that models the constructivist model of learning. Or, some call it a discovery lab. Change those lame, low level questions to those that require kids to think at a higher level. Bam, now you’ve got a great lab!
- **1 Computer Interface Lab:** Write a lab that utilizes a computer sensor (or sensors) for analytical data collection. I will give you a list of the different sensors that are available. Data can be collected & analyzed on site or back in the lab using a computer, TI Graphing Calculator, or Palm Handheld.
- **3 Web Site Reviews:** Zip around the web looking for websites for teachers or students. **Pick three that knock your socks off** and write a brief two paragraph review of them. If applicable, indicate if the site may help students master one or more PA Standards. **Attach your review to a printout of the website’s “home” page (screen).** Be prepared to discuss at class.

- **1 Science Software Review:** Write a one–page review on any science software, like a CD tutorial, you can find. Your field experience mentor may have some to loan. Otherwise see me. If applicable, indicate if the software will help students master one or more PA Standards.
- **Textbook Review:** Use the rubric in your textbook and conclude with a 2–4–paragraph report written to a school district book selection committee describing the strengths and weaknesses of this text. Support your position. Make sure to address the PA Standards.
- **Research Paper –Content Specific Pedagogy:** Write a two–page paper on specific pedagogy that applies to your science discipline. For example, are their teaching strategies unique to biology, chemistry, or physics? What are they? What contemporary topics are “hot” in the teaching of your science discipline? You will need to research journals and pertinent websites in your content area. There are many associations devoted to the teaching of your discipline. You are also highly encouraged to network with these groups and other universities as well via e–mail.

PORTFOLIO

A good portfolio shows personal achievement and growth. Ideally, your portfolio should begin with your first field experience through your student teaching. This project is for you! When you want to land a job, you must sell yourself! Show and be proud of your hard work done at Moravian! Share it with those who are interviewing you for a position! Why not give them a videotape of your teaching talents! With this in mind, make this project your own

creation. This should be a loose-leaf binder, which contains materials assigned throughout this semester (and from other courses, if you wish) that reflect your knowledge base, teaching skills & experience, personal philosophies, accomplishments, and reflections. Examples of student work are also encouraged. If you want to include any activities from the textbook, simply Xerox the page(s). Include any other additional items you think would indicate your competence as a teacher. After student teaching, you can add and modify your portfolio to reflect your new achievements. Then, carry this baby with you as you hunt for a job!

UNIT PLAN

- Your unit plan should include the following:
 - Name of the Unit
 - Title of Course
 - Level of Students
 - Unit Rationale
 - Objectives
 - Content Outline
 - Correlation to PA Standards
 - Materials Required
 - Methods of Formative Assessments Methods (Learning Strategies)
 - Daily Lesson Plans– must follow Moravian College format.
 - Unit Exam

Field Experience Journal

- **2 Weekly Entries:** These are e-mailed to me weekly during your field experience.

- I'm interested in your observations and reflective thoughts.
- Some of your narratives should begin to sound like the cases we are discussing in class from the text. In fact, we will be discussing your cases together as a class. Following are some questions to help guide you through commenting on significant classroom events:

Case Study Prompts:

- ✓ What is the context of the event?
- ✓ What actions were taken first?
- ✓ Who took the action?
- ✓ Why was it taken?
- ✓ What is the class atmosphere like?
- ✓ How did the action make you feel?
- ✓ What question(s) have arisen?
- ✓ What would you do? Why?

- **Please be discreet and use pseudonyms.**

- I would also like you to observe one student throughout your experience and make comments on him/her. **Again, please be discreet and do not use their actual name in your writings.**
- **Case Study:** Using the prompts above; type a case study to discuss with the class one evening.
- **Journal Conclusion**

- Write a one-page critique of the written curriculum for the course you are observing. Reflect on the PA Standards.
- Finally, conclude with a 2-3-paragraph description of what you learned about teaching and students from your experience.

Education 364Z: Curriculum and Instruction In Science Calendar

Please note: topics may change with advanced notice.

* We will make a concerted effort to discuss readings each class. Please be ready to converse about the topics covered in the text.

9/2 – Course Overview & Introduction

- ✓ Meeting at 6:30 w/ Mrs. Modjadidi and Dr. Mayer in Prosser
- ✓ Class Overview

9/9 - Science Teaching Introduction Pt 1

TSSS Text Assignment For This Week: Chapters 1 (Text Activities 1-1 → 1-3 and 1-5)

Due Tonight:

- ✓ Journal Critique #1
- ✓ Micro-Lesson w/ Lesson Plan (Use TSSS page17)

9/16 - Science Teaching Introduction Pt 2 & A Little History

TSSS Text Assignment For This Week: Chapters 2-4 (Activities 2-1 → 2-3 and 5-1)

Due Tonight:

- ✓ Personal Mission Statement & Philosophy
- ✓ Lesson: Classroom Activity Driven (Moco Lesson Plan & Assessment)
- ✓ Critique of Micro-Lesson #1 (Use page 18 in TSSS)

9/23 - Goals & Objectives

TSSS Text Assignment For This Week: Chapters 5 & 6

EMAIL: Critique of last week's lesson: 1-2 pages

Due Tonight:

- ✓ **Journal Critique # 2**
- ✓ **Lesson: Current Event Driven (MoCo Lesson Plan & Assessment)**

9/30- Curricula

TSSS Text Assignment For This Week: Chapters 7 - 10

EMAIL: Critique of last week's lesson: 1-2 pages.

Due Tonight:

- ✓ **Lesson: Internet Assisted Driven (MoCo Lesson Plan & Assessment)**
- ✓ **Journal Critique # 3**

10/7 - Inquiry & Questioning

TSSS Text Assignment For This Week: Chapters 11 & 12

EMAIL: Critique of last week's lesson: 1-2 pages.

EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **Lesson: Laboratory Driven (MoCo Lesson Plan & Assessment)**

10/14 - Safety & Management

TSSS Text Assignment For This Week: Chapter 14 & 22

EMAIL: Critique of last week's lesson: 1-2 pages.

EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **Web Site Review #1**
- ✓ **Computer Interface Lab**

10/21 - Planning

TSSS Text Assignment For This Week: Chapter 16

EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **Text Book Review**
- ✓ **Web Review Site # 2**

10/28 - The Kids We Teach

TSSS Text Assignment For This Week: Chapter 19 - 21

EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **Web Review Site # 3**
- ✓ **Case Study from field experience – Use prompts from syllabus under “Field Experience Journal.”**

11/4 - Strategies and Rationale

TSSS Text Assignment For This Week: Chapters 13, 15, & 18
EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **Software Review**
- ✓ **UNIT PLAN (Rough Draft -Optional)**

11/11 - Professional Development

TSSS Text Assignment For This Week: Chapter 23
EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **“Cookbook” Conversion Lab**
- ✓ **UNIT PLAN (First Draft- Optional)**

11/18 - Assessment

TSSS Text Assignment For This Week: Chapter 17
EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **UNIT PLAN (Final Draft)**

11/25 NO CLASS: Happy Thanksgiving!

12/2- Professional Development

TSSS Text Assignment For This Week: Chapter 24
EMAIL: Field Journal Weekly Entries

Due Tonight:

- ✓ **FIELD EXPERIENCE JOURNAL CONCLUSION**
- ✓ **PORTFOLIO**

12/9 - Closure

Due Tonight:

- ✓ **Videotaped lessons from field experience (MoCo Lesson Plan; no assessment)**
- ✓ **Course Evaluation**

Due by 12/10 via EMAIL:

✓ **Critique of videotaped lesson: 1 to 2 pages (E-mailed To Me)**

Have a wonderful winter break! Happy Holidays!
