COURSE OBJECTIVES/OUTCOMES: The pressing challenge of the 21st century is to create sustainable modes of living and working in a global environment that is increasingly at risk. Through a variety of readings, presentations, and writing assignments, students in this course will examine how threats to the natural environment are influencing our ways of living, and how communities are working to create more balanced lifestyles, social structures, and economies. This seminar introduces first-year college students to a liberal arts education that emphasizes critical thinking, effective writing, and civic engagement. Students will:

- Explore the topic of sustainability with members of their learning community, through coursework and related extracurricular activities.
- Reflect on and articulate an understanding of liberal education as it affects their lives now and prepares them for the future.
- Read critically and comprehensively to integrate others' ideas with their own ideas.
- Utilize a collaborative, process approach to writing to create documents in a variety of genre, including the academic essay, academic research paper, and personal essay.
- Practice behaviors for successful learning, including effective study habits, time management, goal setting, and coping skills.
- Collaborate with faculty and student advisors and engage with the College community, faculty-staff-students, to promote success at Moravian College.

ASSIGNMENTS AND EVALUATION: Due dates for readings and assignments are indicated on the schedule below. Writing assignments will include rubrics outlining criteria for evaluation. Due dates for writing assignments are firm. If for some extraordinary reason you must be late, please talk to me in advance. A late writing assignment loses half a letter grade for each day it is late. Since journal entries are intended to support in-class activities, any entries submitted after the day they are due can earn no more than half credit. It is within the instructor's purview to apply qualitative judgment in determining grades for any assignments and for the final course grade. Students who wish to request accommodations in this class for a disability should contact Mr. Joe Kempfer, Assistant Director of Learning Services for Disability Support, 1307 Main Street (extension 1510). Accommodations cannot be provided until authorization is received from the office of Learning Services.

Journal:	18 entries	20%
First essay:	Draft due: 10/5/09	20%
	Final draft due: 10/7/09	
Research report:	Draft die 11/16/09	25%
	Final draft due 11/20/09	
Personal essay:	Draft due: 12/4/09	20%
	Final draft due: 12/7/09	
Attendance and participation:		15%

ATTENDANCE & PARTICIPATION: I cannot emphasize enough how important it is for you to attend each class, promptly, with your assignment read and your journal entry completed. The success of our learning community depends upon how well we can articulate our individual and collective responses to the readings, as we prepare for and engage in the process of thinking and writing about sustainability. Some participation in events outside of the class time will be required. If you must be absent for some extraordinary reason, you must inform me in advance or supply a note from a legitimate authority. If you miss more than three classes without providing a written excuse, I will inform the dean of students and your grade will drop by one third of a letter grade for each absence. Missing an individual conference counts as missing three classes. It is your responsibility to consult with me if you are late or absent. Your participation grade will reflect your regular, voluntary engagement in class discussion. Full attendance without such engagement will earn no more than a grade of C for participation.

****Please turn off and put away all electronic devices during class.**

ACADEMIC HONESTY: Cheating and plagiarism will not be tolerated. Plagiarism is the misrepresentation of someone else's work as your own. This includes such instances as quoting directly from a published work without giving the author credit (i.e. proper citation), inserting the author's words as your own, using or "borrowing" another student's work, buying a paper from a professional service, etc. It is your responsibility to be familiar with what constitutes plagiarism and, in the event of uncertainty, to ask in a constructive manner about a writing in question before it is due in a final version. You are also required to keep all note cards and rough drafts on papers and assignments until given a final grade for that course. Evidence of plagiarism and cheating will be dealt with in accordance with the college policy on academic honesty found in the Student Handbook. Please read this policy in its entirety. In the event of a suspected infraction – in fairness to your peers and the standards of the college – it is my job to send the materials in question to the Dean's Office at which time you are given the chance to provide your perspective on the matter.

SCHEDULE OF ASSIGNMENTS:

Readings should be completed by the day on which they are listed. This schedule may be revised as the course progresses. I will announce changes in class.
