This course offers an introduction to the field of archival studies in which we discuss the basics of the archival profession. We will take a different approach in looking at recorded information. We are not so much interested in the informational value of a record (content) but more in its external aspects (form, context).

We will explore questions such as:

- What is an archives?
- What are the archival principles?
- What is information?
- Why do people record information?
- How can information be organized?

This is not only a theoretical course; practical work is very much a part of the course. During the workshop sessions of the course we will work on a collection of 18th- and 19th-century property deeds at the Moravian Archives.

The course will result in a research paper (12-15 pages) and involves practical work in the archives.

Goals of the Course:

In this course students will:

- * get an understanding of the basic archival principles and apply them
- * apply their skills in finding bibliographical resources
- * learn to organize and describe archival documents
- * present the results of their research papers.

Research Paper

During the course you will write a research paper of 12 to 15 pages based on your own research. A list of possible topics is included in the syllabus. You can choose a topic from the list or you are free to propose your own topic, but you have to check with me as soon as possible in order to get my approval.

The writing process extends over the whole class. We start with choosing the topic (1), writing a 1/2 page outline and compiling a bibliography (2), writing the draft (3), submission of the final version (4), and giving a formal presentation (5). I will read and comment on the draft and assign a tentative grade to it. Use footnotes and attach a bibliography to your paper. All the assignments have to be submitted electronically on Blackboard before the indicated deadline.

Practical Work

A very important aspect of this course is the practical work with an archival collection at the Moravian Archives. This semester we are going to work with the collection of 18th- and 19th-century property deeds. Each student will work on a set of deeds and identify preservation concerns, perform basic preservation tasks, identify the information content of the deeds, find contextual information on the creator of the records and catalog the deeds, and enter the information in the archives *Augias* system. These workshop sessions will take place at the Moravian Archives (41 W. Locust Street).

Not all the practical work can be accomplished during class hours. Sometimes you will have to perform additional tasks on the deeds. This is considered part of the homework for this class. Please note that you can only work with your collection during the office hours of the Moravian Archives: Monday - Friday, 8:00 - 4:30.

The results of our work will be posted on the Archives's online finding aid system.

Class assignments

Each student will be asked to prepare the following presentations

- a presentation (5 min.) for the session on preservation (Sept. 13)
- a presentation (5-10 min.) for the session on ethical questions (Nov. 22)
- an introduction (3-5 min.) on the author of one of the required readings: who is this person? what is his/her background? what do you know about his/her publications? (see sign-up list)
- a presentation (10-15 mins.) of the results of the research paper (Dec. 6 and 8).

Follow the News

Almost every week there are news stories relating to archives and record keeping. Remember the advisor to President Clinton who stole documents from the National Archives and smuggled them out in his socks? Follow the news and collect these stories. At the beginning of each session there will be opportunity for you to present these news stories in class.

Grade Distribution

Participation + practical work	10%
Bibliography and Outline	10%
Class Assignments (each)	10%
Presentation of paper	10%
Research paper	20%
Exam	20%

Attendance

The number of students for this course is limited. The course can only be successful when each student participates actively. Be well prepared for class discussions, your assigned presentations and be involved in the practical work.

You should attend all class sessions and be prepared to discuss the readings. The workshop sessions at the Moravian Archives count as class sessions and you cannot miss these. Sometimes you will have to do work at the Archives in addition to or at other times than the regular class hours.

Students who miss more than one class sessions without a doctor's note or without another valid excuse will have a third of a grade deducted from their final mark. So a student with a B+ average who misses three classes will receive a B.

Turn off all cell phones in class.

Required Reading

- James M. O'Toole and Richard J. Cox, *Understanding Archives and Manuscripts* (Chicago: Society of American Archivists, 2006).
 - Kathleen D. Roe, *Arranging and Describing Archives and Manuscripts* (Chicago: Society of American Archivists, 2005).
- (both titles are available at the Moravian College Bookstore).
- Selected chapters and articles (as listed in the schedule) will be available as photocopies. Other material is available online (through JSTOR, WorldCat, etc.).

Tools

When working with the deeds you will need to wear gloves. You will also need a special mechanical pencil to make markings on the deeds. These supplies will be provided to you by the Archives for \$5.00. Please pay this fee at the reception desk of the Archives. Please note that you are required to use the supplies we provide you when working with the deeds.

Recommended Reading

The Moravian Archives has a variety of titles that are relevant to our course. They will be available in the reading room of the archives. (Archives are open: Monday - Friday, 8:00 - 4:30).

Research papers

Choose a topic from this list or you can suggest a topic yourself. Titles for papers need to be submitted in session 2 (Sept. 8).

A research paper is 12-15 pages in length and has to be based on original work. You can choose a topic from this list or you can come up with your own topic.

One part of the research is finding your source material. Some suggestions are given here, but you need to find additional titles. Remember that the o'Toole & Cox has excellent references in the notes and bibliography. Use online resources such as JSTOR.

Most resources are NOT available at Reeves but have to be ordered through interlibrary loan. Make sure you start your bibliographic search early and that you order your titles on time. A bibliography and outline need to be turned in in week 8 (Oct. 22).

Archiving the World Wide Web

Discuss the possibilities and challenges of archiving websites. Why do we need to archive websites? Who is involved with it? How can we do it?

Thomas E. Brown, "Toward the Appraisal of Web Records" *Archival Outlook* (July/Aug. 2006): 6, 25. (available online, www.archivists.org under Resources).

Archives in Non-Western Countries

Archives have a long tradition in Europe and North America. How is this different in countries in Africa, Asia or South America? Discuss the challenges that archives in these countries face.

Preservation of video and audio tapes

discuss the problems with analog data on magnetic tape and suggest possibilities for conversion to other media such as DVD. weigh advantages and disadvantages. take costs into consideration

The Future of Archives

What will the future of the archival profession be in the digital age? What does the archival profession have to say about this?

The Feminization of the Office

In the beginning of the 20th century office work became more and more a woman's job. What were the implications for the creation of documents and for record keeping?

Sharon Hartman Strom, *Beyond the Typewriter: Gender, Class, and the Origins of Modern American Office Work, 1900-1930* (Urbana : University of Illinois Press, 1992).

Margery W Davies, *Woman's Place is at the Typewriter: Office Work and Office Workers, 1870-1930* (Philadelphia: Temple University Press, 1982).

Archives and the World Wide Web

How do archival institutions present themselves on the internet? What kind of information do they place on their websites? Do they make full use of the internet's potentials? Compare the websites of a number of different archival institutions (e.g. national archives, local archives, college archives, archives of religious organizations etc.). Relate your findings to the mission of an archives.

see www.uidaho.edu/special-collections/Other.Repositories.html

The Myth of the Paperless Office

More than thirty years ago the magazine *Business Week*, (30 June 1975, p. 48) predicted that the "paperless office" was near. We know today that they were wrong. What is the concept of the "paperless office"? Why did the paperless office never happen and what are the consequences for record keeping?

The Development of Storage Systems for Documents and Files

The growing amounts of records that were produced in offices in the 19th and 20th centuries required new ways to store them. How did storage systems develop and how did they influence the ways records were kept and organized?

see o'Toole and Cox, *Understanding Archives*, 27-29.

The Importance of the French Revolution for the Archival Profession

Ernst Posner, "Some Aspects of Archival Development Since the French Revolution." in *A Modern Archives Reader: Basic Readings on Archival Theory and Practice*, edited by Maygene F. Daniels and Timothy Walch, (Washington, D. C.: National Archives and Records Service, 1984): 3-14. [originally published in *American Archivist* 3 (July 1940): 159-172].

Posner's view is somewhat challenged by: Panitch, Judith M. "Liberty, Equality, Posterity?: Some Archival Lessons from the Case of the French Revolution." *American Archivist* 59 (Winter 1996): 30-47.

The History of the Archival Profession in America Compared to another First World Country

Use o'Toole and Cox for the American background. Choose a country in Europe.

Or: Japan. see www.archivists.org/publications/epubs/accesstoarchives/index.asp

Is the Archivist a Historian?

Both the archivist and the historian work with historic records, but their activities and approach are very different. Define the profession of an archivist in relation to that of a historian.

W. Kaye Lamb, "The Archivist and the Historian," *The American Historical Review*, Vol. 68, No. 2. (Jan., 1963), pp. 385-391. (JSTOR)

The History of the National Archives of the United States

The National Archives of the United States was established in 1934, much later than in other countries. Write about the history of this institution and compare to other national archives.

Archival Forgeries and Their Consequences

Throughout history numerous documents have been forged. General literature can be found in O'Toole and Cox, 158-9. Choose a case of document forgery and discuss it in relation to the following aspects: the role of the archivist

- e.g. • the Donation of Constantine (between 750-850)
- the Hitler Diaries (1983) (Robert Harris, *Selling Hitler*, (New York: Pantheon Books, 1986)).
- the Salamander Letter by Mark Hoffmann Forgeries (early 1980s)

The U.S. Reclassification Program

In March 2006 it was revealed by the National Security Archives that thousands of declassified government records had been reclassified. This program was initiated under the Clinton administration in the Fall of 1999. Why is this program so controversial? Write from an archivist's perspective.

Allen Weinstein, "An Update on the Declassification Process at NARA" *Archival Outlook* (July/Aug. 2006): 16, 25. (available online, www.archivists.org under Resources).

Digital Cameras in the Reading Room

More and more researchers bring their digital cameras to the archives when they come to do research. The policies regarding the use of digital cameras differ from archives to archives. What are the advantages and disadvantages as seen from the perspective of the archivist and from the researcher? Compare practices between different archival institutions (e.g. do online research, telephone interviews, etc.).

Security Issues in Archives

In 2005 Bruce Craig wrote that hundreds of items had gone missing from the National Archives. Theft is a serious problem for archives, because unique documents cannot be replaced. How do archives deal with security issues? What policies and strategies are developed?

Bruce Craig, "Hundreds of Items Go Missing from National Archives" *Archival Outlook* (Jan./Feb. 2005): 14.

Allen Weinstein, "Records Security" in *Archival Outlook* (Sept./Oct. 2005): 22.

Archives in the Ancient World

How did archives develop in the ancient world and how did ancient archival practices influence Western European record keeping?

see the bibliographic essay in o'Toole and Cox, *Understanding Archives*, 161.

James P. Sickinger, *Public Records and Archives in Classical Athens*, (Chapel Hill: University of North Carolina Press, 1999). (in Reeves)

The Purpose and Meaning of Diaries

Why do people write diaries? How did the writing of diaries develop in early modern history? What different kinds of diaries were kept? What is the purpose of keeping a diary?

See o'Toole and Cox, *Understanding Archives*, 153-154.

"Vandals in the Stacks"

In 2001 Nicholson Baker published *Double Fold*, in which he accused archivists and librarians of destroying our cultural heritage by microfilming and digitizing books, magazines, newspapers and archival records. The book was received with many laudatory reviews. The book provoked reactions from the field of archivists and librarians, such as Richard Cox's *Vandals in the Stacks: A Response to Nicholson Baker's Assault on Libraries*.

What was this controversy about? Who is Nicholson Baker? What was Baker's argument? How did Cox counter? Where do you stand in the discussion?
