METEOROLOGY EASC (120) SYLLABUS METEOROLOGY WINTER, 2012

Richard A. Jackson, Ph.D.

COURSE DESCRIPTION: Atmospheric processes and their effects on the human population including temperature, air pressure, water vapor, etc.; the gradients and interactions of each variable and how they change in time and space. Laboratory includes the qualitative and quantitative analyses of meteorological phenomena.

TEXT: Understanding Weather and Climate; Edward Aguado & James E. Burt, 5th Ed.; Prentice Hall; 2010.

Note: It is mandatory that the textbook be purchased for this course. The course textbook MUST be brought to each lecture.

COURSE OBJECTIVES: Students will understand the following:

- 1. Students can demonstrate knowledge of atmospheric composition and structure
- Students can demonstrate knowledge of scientific methods relating to qualitative and quantitative analysis
 of atmospheric variables and can develop some basic analysis techniques to aid in understanding
 weather and climate
- Students can demonstrate knowledge of a wide range of atmospheric phenomena and their roles in affecting weather and climate on local, regional, continental, and global scales.
- 4. Students can demonstrate knowledge of the typical vertical variation of the basic variables used to quantify the atmospheric state, including temperature, pressure, humidity, winds, and natural and anthropogenic particles
- 5. Students can demonstrate knowledge of the basic techniques used by meteorologists (and other scientists) to gather and interpret atmospheric data
- Students can demonstrate knowledge of climate and climate change, together with the possible influences
 that humans have on diverse climate phenomena
- 7. Students can demonstrate knowledge of the forces that drive three-dimensional atmospheric motions
- Students can demonstrate knowledge of clouds and their formation mechanisms, together with the
 precipitation types and other materials that precipitation cleanses from the air
- Students can demonstrate knowledge of a variety of large-scale atmospheric phenomena, including the
 extratropical cyclone, the jet stream, and the general circulation

OFFICE HOURS: T, Th 3:30-4:30, or by appointment.

ASSESSMENT:

3 One Hour Lecture Tests (100 points each) 75%

Laboratory Exams:

 Mid-Term
 50 points
 12.5%

 Final
 50 points
 12.5%

ATTENDANCE POLICY: Attendance will be taken in each class and laboratory period. Unexcused absences from lecture and lab will be reflected in the final grade. Students have the responsibility to secure and present evidence of the nature of any legitimate excused absence.

CELL PHONES: Cell phones MUST be turned off or put on "vibrate only" during class or lab. No texting or other use of cell phones will be tolerated during class.

LECTURE SCHEDULE: Please note that changes and alterations of topics and dates are inevitable so please remain flexible.

TOPIC/CHAPTER	WEEK OF:
Introduction/Atmospheric Composition (Chap. 1)	Jan. 16
Solar Radiation/Seasons (Chap. 2)	Jan. 23
Energy Balance & Temperature (Chap. 3)	Jan. 30
Atmospheric Pressure & Wind (Chap. 4)	Feb. 6
Lecture Exam #1 Fel	b. 13
Atmospheric Moisture (Chap. 5)	Feb. 20
Clouds (Chap. 6)	Feb. 27
Semester BreakEnjoy!!!! No Class	sses Mar. 5
Precipitation Processes (Chap. 7)	Mar. 12
Atmospheric Circulation & Pressure Distributions (Chap.	8) Mar. 19

Air Masses & Fronts (Chap. 9)	Mar. 26
Lecture Exam #2	Apr. 2
Midlatitude Cyclones (Chap. 10)	Apr. 9
Lightning, Thunder & Tornadoes (Chap. 11)	Apr. 16
Tropical Storms & Hurricanes (Chap. 12)	Apr. 23
Lecture Exam #3 To Re Announc	ed.

*Note: Lecture Test Dates are subject to change

LABORATORY SCHEDULE:

LAB TOPIC			WEEK OF:
No lab meeting			Jan. 16
Insolation & Temperature			Jan. 30
Atmospheric Pressure/Wind			Feb. 6
Weather Stations			Feb. 13
Moisture, Clouds & Precipita	tion		Feb. 20
Lab Mid-Term Examina	ation	Feb. 27	
Semester Break	No Labs	Mar. 5	
Weather Map Analysis			Mar. 12
Weather Map Analysis (conti	nued)		Mar. 19
Mid-Latitude Cyclones			Mar. 26
Thunderstorms, Tornadoes &	Hurricanes		Apr. 9
Lab Final Examination		Apr. 16	

Students who wish to request accommodations in this class for a disability should contact Mr. Joe Kempfer, Assistant Director of Learning Services for Disability Support, 1307 Main Street (extension 1510). Accommodations cannot be provided until authorization is received from the office of Learning Services.

The Writing Center is located in a building that is not accessible to persons with mobility impairments. If you need the services of the Writing Center, please call 610-861-1392.
