Course Description:

A course which applies nursing knowledge, interventions and attitudes for vulnerable populations challenged by acute and chronic alterations in physical and mental health. Students analyze responses to mental health crises and episodic interruptions of health, and experience collaborative health care delivery in a variety of settings.

Course Objectives:

1. Synthesize knowledge from the humanities, sciences, public health, ethics and nursing theory as a basis for determining and prioritizing health needs of challenged populations across the life span.
2. Collaborate with community and health care team members to foster optimal health of individuals, families and communities.
3. Utilize nursing roles in planning, providing, and evaluating evidence-based safe, quality care for clients across the life span in a variety of settings and clinical partnerships
4. Address cultural and spiritual concerns in providing holistic care to individuals, families, and communities.
5. Demonstrate leadership and professional accountability in partnership and care provision in a variety of settings.

Prerequisites: All required sciences; all required nursing courses

Co-requisites: NURS 313

Required Textbooks:

Assessment Technologies Institute (ATI) Products: Community Health-specialty, Adult Medical Surgical Nursing, Mental Health, and Pharmacology for Nursing.

Ball, J.W., Bindler, R.C., & Cowen, K.J. (2012). *Principles of pediatric nursing: caring for children*. (5th ed.). Boston: Pearson.

Boyd, M.A. (2012) *Psychiatric nursing: Contemporary practice*. 5th ed. New York: Lippincott, Williams, & Wilkins.

Davidson, M. R., London, M.L. & Ladewig, P. A. (2012). *Old's maternal-newborn nursing & women's health*. (9th ed.). Boston: Pearson.

Harkreader, H., Hogan, M. A. (2007). *Fundamentals of nursing: Caring and clinical judgement*. (3rd ed.). (Also study guide by Hogan, Thobagen & Harkreader) Philadelphia: W.B. Saunders.

Kee, J. L., Hayes, E. R. & McCuiston, L. E. (2009). *Pharmacology: A nursing process approach* (6th ed.). St. Louis: Elsevier.

Kee, J. L., Hayes, E. R. & McCuiston, L. E. (2009). *Study guide pharmacology: A nursing process approach* (6th ed.). St. Louis: Elsevier.

Smeltzer, S.C., Bare, B. G., Hinkle, J. L., & Cheever, K. H. (2009). *Brunner and Suddarth's textbook of medical- surgical nursing* (12th ed.). Philadelphia: Lippincott, Williams, & Wilkins.

Stanhope, M. & Lancaster, J. (2010). *Foundations of nursing in the community*. (3rd ed.). St. Louis: Mosby.

* It is encouraged that students utilize other textbooks from required nursing and support courses as needed for class and clinical assignments.

On Reserve in Reeves:

Jenkins, J. F. & Lea, D. H. (2005). *Nursing care in the genomic era: A case-based approach*. Sudbury, MA: Jones & Bartlett.

Course Requirements:

1. Nursing Department Attendance Policy

Classroom attendance is necessary to promote the learning of the theoretical component of the curriculum and to enrich and expand the application of the clinical learning process. Students are expected to attend all classroom activities. An instructor may lower a student's grade because of a class absence. If absences occur, it is the student's responsibility to make up whatever work has been missed. Permission to make up assignments, quizzes, and periodic tests may be granted at the discretion of the instructor. Authorization to make up a final examination is given only by the Office of Academic Affairs.

Clinical attendance is mandatory for the student to consistently demonstrate the ability to meet course objectives. It is the student's responsibility to notify the appropriate person(s) as identified by course faculty in the event that he/she is unable to attend clinical experiences. Such notification is to occur up to two hours prior to the scheduled clinical experience. If a student is absent from class/clinical activity due to illness, a health care provider's statement verifying the illness and certifying that the student is able to resume class or clinical activity may be required.

All clinical absences will be tracked in a database for review by future course instructors and the Chairperson of the Department of Nursing. Students who request time off from clinical, due to events in which they have no control (death of a family member), will contact the course faculty and the clinical instructor, and the determination for clinical makeup will be decided. Students who arrive to clinical practice late or leave early may be required to make up those cumulative minutes at the end of the semester on a clinical makeup day. It is up to the discretion of the course faculty to require clinical makeup for students who routinely leave clinical early due to co-curricular activities. For student involved in co-curricular activities such as sports or music, etc. schedules must be submitted to clinical faculty at the beginning of the semester so that clinical experiences can be appropriately determined.

Students will be required to makeup clinical absences. The designated clinical makeup day will be scheduled on the Saturday before the last week of clinical practice. It is mandatory that students requiring clinical makeup attend that makeup day. Students will be charged \$250.00 per day of clinical make-up to reimburse the department for clinical supervision and administrative fees. All clinical requirements, including make-up, must be completed by the end of the final examination period for that semester. Any associated fees must be paid in full by the end of the final examination period for that semester. Students are exempt from clinical make-up if they are attending a faculty approved conference (i.e.-NSNA or SNAP convention). In the event that a student receives an excused absence for a required educational trip and later in the semester incurs more clinical absences, the student may be in a position to consider withdrawal from the course, if the clinical experiences absences are too numerous to be made up within the available faculty contract time.

In the event of a protracted illness requiring multiple missed clinical days, the student, course instructor(s), and Chairperson will meet to discuss alternatives and develop an individual education plan.

2. Nurs 315 Class Attendance Students are expected to be prepared and attend all class meetings. This includes completing assignments prior to attending class. Tardiness is a distraction to the class and will not be tolerated. Attendance will be taken and students will receive points to a participation grade based on the following:

- Students with 0-1 unexcused absences and shows significant investment in the daily life of the course (prepared, adds to discussion, answers questions, etc) = 2 % points
- Students with 2 unexcused absence and shows acceptable investment in the daily life of the course (prepared, adds to discussion, answers questions, etc) = 1 % point
- Students with more than 2 unexcused absences, little observed investment in the daily life of the course = 0 % points

If unable to attend a class, please contact the course faculty via email or phone. Students are responsible for providing a doctor/nurse practitioner/health center excuse for an excused absence. Students are responsible for obtaining any notes, handouts, or other class items from classmates.

3. Plagiarism is the intentional use of another's words or ideas as your own. This can range from using another individual's direct words or changing the words slightly (paraphrasing) without the appropriate citation to purchasing a paper from the Internet or a professional writing service. Refer to the Moravian College Academic Honesty Policy in the Student Handbook. Where applicable, class assignments are to be typed and submitted according to APA style (6th edition).

4. Accommodations for learning and other disabilities: Students who wish to request accommodations in this class for a disability should contact Elaine Mara, assistant director of learning services for academic and disability support at 1307 Main Street, or by calling 610-861-1510. Accommodations cannot be provided until authorization is received from the Academic Support Center.

Students who wish to request accommodations for support of other disabilities should contact Dr. Ron Kline, Director of the Counseling Center (ext. 1510).

5. All examinations are to be taken at the scheduled time, unless the instructor is notified of a competing previously scheduled scholastic or athletic activity. Any individual who is not at the scheduled examination based on a claim of illness is required to provide appropriate medical documentation of a valid medical reason for absence. An alternate examination may be determined by the course faculty. **The Final Exam, per Moravian College policy, must be taken at the appointed time.**

6. Completion and satisfactory achievement of all course objectives in the laboratory and clinical settings, and curriculum requirements including standardized assessment tests (ATI Mental Health Examination, ATI Community Health Examination).

7. Learning activities stated on the topical outline section of this syllabus are to be completed prior to class time. The student can expect to work approximately 10-12 hours per week in preparing for this class.

8. Demonstrate expected professional behavior and appearance when in the classroom and clinical laboratory (both uniform and street clothing).

9. Maintenance of confidentiality for all assigned patients or clients as required by law (HIPAA). Students will be required to read and know agency policies on confidentiality and may be required to sign agency forms on confidentiality.

10. Students are reminded of the importance of respect and courtesy toward others. As a courtesy to your colleagues, phones must be in the silent mode during class. Texting or use of cell phones for internet access during class is unacceptable. Students are expected to be respectful of the time of both faculty and their peer group. Thus, if you are unable to keep an appointment with a faculty member or student peer related to course work/group projects, please be courteous and notify others of your need to cancel or reschedule the appointment.

Methods of Evaluation:**

1. Reaction Paper	10%
2. Participation and involvement	10%
>Attendance (see #2 of course requirements)	➤ Attendance: 2%
>Seminar preparation packets (on blackboard)	➤ Prep/assignments/quizzes: 8%
>Take home assignments and quizzes	
3. Health Promotion and Prevention Seminar	5%
4. Exams (3)	55% (15%; 15%; 20%)
5. Final Exam	15%
6. ATI testing (see chart below)	10% (5% for ATI community and 5% for ATI mental health)
Total	100%

** The Moravian College nursing program is accredited by the Commission on Collegiate Nursing Education. As part of the accreditation process the program must provide evidence of

assignments completed by students. Any of the methods of evaluation used in this course, may be used as evidence of student assignments during the accreditation process.

Core Components of nursing program addressed in this course:

<u>Community</u>	<u>Holism</u>	<u>Inquiry</u>	<u>Professionalism</u>
Health Care	Spirituality	Assessment	Accountability
Economics	Health Promotion	Critical Thinking	Advocate
Health Policy	Wellness	Reflectivity	Coordinator
Vulnerable	Caring	Research	Educator
Populations	Morality		Leadership
Human Diversity	Compassion		Professional Values
			Ethical Standards

Grading Policy:

Assignments are expected on or before their due date both for class and clinical. If class assignments are submitted late, five points per day will be deducted from the grade.

The grading scale is as follows:

A = 93-100	B- = 80-82	D+ = 67-69
A- = 90-92	C+ = 77-79	D = 63-66
B+ = 87-89	C = 73-76	D- = 60-62
B = 83-86	C- = 70-72	F = <60

Please note that it within the instructor’s purview to apply qualitative judgment in determining grades for any assignments and for the course final grade.

ATI Requirement: Mental Health Nursing and Community Health Nursing

These assessments will be factored into course grades. Each proctored assessment (mental health and community health) will count as **5% of the grade**. Students will achieve better outcomes if serious preparation is taken prior to the assessment.

All students are required to take the community health and the mental health online practice assessments prior to the proctored examinations. Students are also required to do a focused review of the online practice assessments in order to remediate in lower performing areas. The online practice assessments and focused review of the practice assessments (Community and Mental Health) **must be completed by November 19, 2012.**

Students will take the proctored assessments and earn points based on the proficiency level achieved. All students are required to do a focused review of their proctored test results for remediation purposes. Any student who does not earn a proficiency level 2 benchmark is required to re-take the proctored assessment. As before, the student will be required to perform a focused review on the second proctored assessment in order to earn the 2 remediation points. The following chart details how the grade will be determined based on the proficiency levels. **The highest ATI score earned will be used for grade calculation purposes (5% of course grade for Community score and 5% of course grade for Mental Health score).**

Points Awarded for Taking the Online Practice Assessment and focused review	Proficiency Level on ATI Proctored Assessments	Points Awarded for Achievement on ATI Proctored Assessment	Points Awarded for focused review of missed topics from ATI Proctored Assessment*	TOTAL POSSIBLE POINTS AWARDED (converts to a percentage when multiplied by 10)
2	Proficiency Level 3	6	2	10
2	Proficiency Level 2	5	2	9
2	Proficiency Level 1	3	2	7
2	Below level 1	2	2	6

***The nursing faculty is able to see the total minutes spent on remediation. Remediation points will not be computed if it appears as though remediation time was insufficient. It should take approximately two hours to remediate in areas of under-performance. For example, if the student earns a score of below level 1 and spends 30 minutes in remediation, this will be considered as insufficient remediation time and no remediation points will be awarded.**

Clinical Learning:

Students are required to earn a *Satisfactory* clinical evaluation in each nursing course in order to progress in the curriculum. Failure to earn a *Satisfactory* clinical evaluation will result in a grade of “F” in the course. Students are expected to adhere to the policies and procedures of the clinical agencies in which they are assigned.

St Luke’s University Hospital policy on piercings and tattoos includes the following:

- The only acceptable visible piercings are ear piercings.
- Tattoos must be covered.
- If a student is at St. Luke's for clinical and a tattoo is visible, the student will be sent off clinical. The student must pay for a makeup experience. If the student has a second infraction, he/she may not go back to that unit, which translates to a clinical failure.

Please note while the instructor will try to hold to the flow of the course outline, it may change over the course of the semester. Students will receive notification of syllabus changes in class or through electronic communication.
