*"To live in openness toward others and to have an open-ended curiosity toward life and its challenges is essential to educational practice. To live this openness towards others respectfully and, from time to time, when opportune, critically reflect on this openness ought to be an essential part of teaching."*

Paulo Freire

## ESSENTIAL QUESTIONS

- What ways do I need to reflect in order to continuously grow as a teacher?
- How can I make myself aware of the learning taking place in my classroom?
- What is the nature of the learning that I want my students to gain?
- How do I create classrooms that take into consideration all students in my class?
- What practices do I need to learn in order to be the sort of teacher I want to be?
- What is the vision that will drive my teaching?

## ENDURING UNDERSTANDINGS

- ☞ The methods a teacher chooses grows out of their view of learning and what learning is of most value.
- ☞ Learning grows from cohesive learning communities.
- ☞ Good teachers continuously assess the learning that occurs in their classroom.
- ☞ Every teacher is unique and that uniqueness grows from the teacher's personal vision.
- ☞ Learning to teach takes a lifetime of inquiry.
- ☞ Classrooms need to be places of inquiry driven by curiosity.

## ATTENDANCE/ASSIGNMENTS

Since the issues being considered in the course require informed discussion and involvement, you are expected to attend every class with a basic understanding of the assigned reading or with questions to be raised about the reading. You are also expected to be on time. If you must be absent for some reason, you must let me know ahead of

time, unless there is some emergency. In the case of an emergency, speak to me about the situation as soon as you are able. Absences will be excused for legitimate reasons such as illness. For each unexcused absence, a 0 will be calculated for 2% points of your total grade. Missing more than three sessions will be a signal to me of a serious problem that we should discuss.

There will be unannounced quizzes throughout the semester. You will be permitted to make up these quizzes if your absence is excused. In addition, it is your responsibility to find out about and secure any materials that may have been distributed or assignments given during missed classes.

Absence, for any reason, is not an excuse for missed work. If circumstances arise that keep you from completing an assignment when it is due, you should discuss the situation with me. I have provided my phone number and e-mail so that you can contact me. It will be your responsibility to talk to class members to find out in detail what you missed.

Grades for assignments that are late without prior agreement will be lowered by 5% of the total value of the assignment on the first day and 5% more for every subsequent two days of lateness.

#### **ACADEMIC HONESTY**

The Student Handbook defines plagiarism as: "A major form of academic dishonesty...the use, deliberate or not, of any outside source without proper acknowledgment." The Handbook then states, "Students may not submit homework, computer solutions, lab reports, or any other coursework prepared by, copied from, or dictated by others." I will abide by the overall academic honesty procedures as laid out in the student handbook. Make sure that you read the policies carefully. For instance, the Handbook also demands this. "Students must keep all notes, drafts, and materials used in preparing assignments until a final course grade is given." Please follow that dictum. You are encouraged to discuss readings and to seek feedback on papers from your colleagues in the class. Collaboration is great. Cheating is wrong. The work you turn in, ultimately, must be of your own creation.

Work proven to be in violation of the academic honesty policy will receive a 0 and the Dean of Curriculum & Academic Programs will be informed of the violation. In addition, violations of the academic honesty policy would reflect a cynical view of learning itself, one not needed in the educational world. Acts of plagiarism or cheating would make it very difficult for me to support the violators application for student teaching. Acts of academic dishonesty are routinely reported to the Teacher Education Committee who accepts and rejects candidates into student teaching.

#### **ACCOMMODATIONS**

Students who wish to request accommodations in this class for a disability should contact Elaine Mara, assistant director of learning services for academic and disability support at 1307 Main Street, or by calling 610-861-1510. Accommodations cannot be provided until authorization is received from the Academic Support Center.

Comenius Center students who believe that they may need accommodations in this class are encouraged to contact the Dean of the Comenius Center as soon as possible to enhance the likelihood that such accommodations are implemented in a timely fashion.

#### **CELL PHONES**

Cell phones must be put away during class, meaning no texting during class.

## ASSIGNMENTS FOR TUTORING

Tutoring allows you to carry out your most important work in EDUC260: to consciously develop teaching practices laid out in the matrix in relation to student learning. You will study how to choose appropriate instructional strategies and then, while carrying those strategies out, to assess your students to determine the extent to which you are reaching important goals. That assessment of student learning will allow you to assess your teaching. Though your work will focus on English language learners and learners with disabilities, you will be studying skills for the reflective teaching of all students. Here are the ways you will document and assess your own work:

**A. Daily Notes:** Start with a piece of paper where you date each session and write down the names of the students with whom you are working. Before, during, or right after the tutoring, record the goals for the day, your pre-chosen and in-flight chosen methods, specific student behavior related to the goals, other important student behavior, and an assessment of your methods in light of information about the students. That assessment should point to how you will approach teaching in your next session. When you are able, ask for examples of student work to copy. Notes may be rough including the use of incomplete sentences. Notes may be brief, but they must be meaningful and useful to you.

### B. Journal Entries:

1. **Initial Impression Entry and First Sets of Daily Notes:** Turn in a one-to-two page discussion where you share initial impressions of the tutoring experience. Your discussion might include descriptions of students, descriptions of initial tutoring sessions, plans for how you want to proceed, concerns, and more. Also turn in your daily notes for the first two sessions as well as any student work you have gathered. *(Due 9/30 by Noon)*

2. **Tutoring Journals: Progress Reports (Include appropriate daily notes and student work):** In two pages, describe your teaching, the student response to your teaching, and what you are learning about how to teach the students. Use your daily notes, student work, and data you have gathered to write the journal entry, clipping all of this supportive material to your journal entry. So, like the microteaching analysis, this journal entry is a reflection on and analysis of your teaching based on data and your own observations. In the spirit of a journal entry, your writing does not need to be polished, but you should re-read the entry for fluency and you should spell-check. *(Due 10/21 and 11/8 by Noon)*

### C. Final Tutoring Report

In approximately five double-spaced pages, write a formal report to your cooperating teacher. **Attach an appendix with data you have gathered, including daily notes and student work.** The paper must be well written in that it asserts big ideas with supporting details. Use this paper as a general guide for font and margins. In the report you must:

- Describe each student(s) you have tutored as a learner.
  - Discuss the formative assessment strategies you used and the data you attained from those strategies.
  - Describe the extent to which each student reached learning goals.
  - Describe teaching strategies you used with each student and your rationale for selecting those strategies.
  - Explain what you think are the best strategies for working with these particular students and why. Support the why by referring to data gathered.
  - Draw an overall conclusion concerning what you have learned about teaching English language learners and learners with disabilities.
- (Due 12/2 at Noon)*

### D. Lesson Plans and Lesson Analysis:

After you get to know your students and towards the end of the tutoring experience, you will take the knowledge you are gaining about the students and you will teach two lessons to an entire group. Ideally these lessons will be in your content area or will concern literacy skills. You will turn in two lesson plans using the format in the back of the handbook.

As with the microteaching, you will write an analysis of the two (or more) lessons that you teach. Again, you answer this question **Given the learning taking place in my lesson, how should I teach?** With the lesson analysis, you will have a special focus on diversity. That is, **given the learning of English language learners and learners with disabilities taking place in my lesson, how should I teach to the diversity of students in my class?** As with the microteaching analysis, you must describe student learning and teaching methods. You also need to draw conclusions from these descriptions, you must reflect on critique your practice. Given the analysis of these lessons, how will you teach in the future, making sure to address how you teach to the diversity in your class.

The lesson analysis should be around three double-spaced pages and will be more informal than the microteaching analysis, since it is a journal. Plan to include data from the lessons. That might include student work, coop notes, and more.

Suggestion: After each lesson, start to write your lesson analysis so you have less to do at the very end of the semester. *(Due Wednesday, 12/4 at Noon)*
