Moravian College

Department of Biological Sciences Anatomy and Physiology Lecture - BIO 103 Fall 2014

Instructor: Dr. Cecilia M. Fox

Phone: 610-861-1426

E-mail: cfox@moravian.edu

Office: Collier Hall of Science, Room 311B
Office Hours: Wednesdays 12-2pm, Thursdays 1-3pm

and by appointment

Lecture: Mondays, Wednesdays and Fridays 8:55-9:45am - Dana Lecture Hall,

Collier Hall of Science

Laboratory: 4 sections: Mondays 1:15-4:15pm (Fox), Wednesdays 1:15-4:15pm or 6:30-

9:30pm or Fridays 1:15-4:15pm - Collier Hall of Science - Room 303

Textbook: Seeley's Principles of Anatomy and Physiology, 2nd Ed.

by Philip Tate

McGraw Hill Publishers

Lab Manual: Laboratory Manual for Seeley's Principles of Anatomy and Physiology, 2nd

<u>Ed.</u>

by Eric Wise

McGraw Hill Publishers

Dissecting Kits: Available in the Bookstore

<u>Course Description:</u> This course offers an in depth anatomical and physiological study of the human integumentary, skeletal, muscular and nervous systems. Concepts and principles important to the understanding of the human body are addressed in lecture as well as case study assignments of clinical situations. Laboratory includes cat and organ dissections, microscope study of tissues and evaluation of physiological processes.

<u>Course Objectives</u>: Upon completion of this course, the student will be able to:

- a) understand the human anatomy of the integumentary, skeletal, muscular and nervous systems
- b) understand the relationships between structure and function in the various systems
- c) recognize the different types of cells and tissues found in these systems
- d) understand the physiological mechanisms behind the human body's response to normal and stressed situations
- e) appreciate the complexity of living organisms through dissection of selected mammalian organs

<u>Grading:</u> The grading system is as follows:

(+/- will be administered as the professor deems appropriate)

 $A = 90 \cdot 100$ $B = 80 \cdot 89$ $C = 70 \cdot 79$ D = 60 - 69

Your final grade will be based on the following criteria:

Three lecture exams: 100 points each = 300 points Two lab exams: 100 points each = 200 points $Best\ ten\$ lecture quizzes: 10 points each = 100 points Final lecture exam: 200 points Case study presentation: 100 points Lecture participation and preparation: 100 points 100 points

Total: 1000 points

- ** Both lecture material and textbook readings are fair game for lecture exams.
- ** The final lecture exam is cumulative.
- ** Case study presentation will be discussed as the course progresses.
- ** Please note: it is within the instructor's purview to apply qualitative judgment in determining grades for an assignment or the entire course

Expectations:

- a) Attendance: Regular lecture and lab attendance is expected. Please be on time! No make-up exams will be given unless you have an acceptable reason (family emergency, illness, etc). If an emergency should arise, you must notify me prior to the lecture exam and not after. If you plan to miss a lab please notify Dr. Fox or Ms. Hosier in advance. Students are allowed a maximum of three absences in lecture and one absence in lab within this semester. If you miss class or lab more than the allowed times, 50 points will be deducted from your lecture or lab participation grade. Another 10 points will be deducted from your lecture or lab participation grades for each additional absence. Please be aware that absences are not divided into excused and unexcused. Regardless of the reason, an absence from class or lab is counted as an absence.
- b) Cheating: will not be tolerated. Students will be held to the highest standards as specified by the Moravian College Honor Code. Violations of this code will be handled in the most severe manner allowed by college policy.
- c) Reading Assignments: should be completed prior to lecture as well as lab.
- d) Lecture Quizzes: A quiz covering the week's material will be given on <u>Fridays.</u> Make-up quizzes are <u>not offered</u> under any circumstances since only the top 10 are counted in your final grade.
- e) Lab Preparation: You are expected to come to lab prepared for that day's exercise. For each lab session please bring your: textbook, lab manual, lecture notes and dissection kit.

- f) Extra Help: If difficulties interpreting lecture or lab material arise, please contact your professor(s). Tutoring sessions can be arranged.
- g) Cell Phone/Technology Policy: Please see attachment following schedule.

Tentative Lecture Schedule

Week of Aug. 25	Topic Readi	ng Assignment Chapter 1
Sept. 1	The Chemical Basis of Life	Chapter 2
	(Brief overview) Cell Structures and Their Functions	Chapter 3
Sept. 8	Cell Structures and Their Functions (con't)	
Sept. 15	Tissues, Glands and Membranes	Chapter 4
Sept. 22	Integumentary System	Chapter 5
Sept. 24	Exam 1 (Intro through Tissues)	
Sept. 29	Histology and Physiology of Bones	Chapter 6
Oct. 8	Anatomy of Bones and Joints	Chapter 7
Oct. 11-14	No Class - Fall Break	
Oct. 13	Anatomy of Bones and Joints (con't) Histology and Physiology of Muscles	Chapter 8
Oct. 20	Anatomy and Functions of Skeletal Muscles	Chapter 9
Oct. 27	Anatomy and Functions of Skeletal Muscles	Chapter 9
Oct. 29	Exam 2 (Integumentary through Skeletal System)	
Nov. 3	Anatomy and Functions of Skeletal Muscles (con't)	Chapter 9
Nov. 10	Functional Organization of Nervous	Chapter 10

Tissue

Nov. 17-19 No Class – Society for Neuroscience Conference

Nov. 21 Exam 3

(Muscular System)

Nov. 24 Central & Peripheral Nervous Chapter 11

Systems

Nov. 26-30 Thanksgiving Holiday

Dec. 1 Special Senses Chapter 13

Autonomic Nervous System Chapter 14

December 9 Final Exam

(at 8:30am)

Technology and the Downside of Multitasking

Recently, the abundance of cell phones, iPads, laptops and other devices has produced something known as the "problem of divided attention". Articles in the New York Times, Harvard Mental Health Letter and Scientific American Mind all summarize several studies of productivity in business and medical settings. Researchers found that after responding to email or text messages, it took people more than 15 minutes to re- focus on the "serious mental tasks" they had been performing before the interruption and in some cases, this initial mental task was completely forgotten. Other research has shown that when people attempt to perform two tasks at once (e.g., following what's happening in class while checking text messages), the brain simply cannot perform these tasks equally. The brain must abandon one of the tasks to effectively accomplish the other. So, multi-tasking is not an efficient or productive way to learn or retain information.

Overall, the human brain works best when focusing on a single thread of related thoughts. By being fully engaged with the pursuit, you may experience a number of positive effects, such as more pleasure, faster learning or greater productivity. Perhaps even all three!

For this reason alone you should avoid the problem of divided attention when you are in this class. However, there is another, equally important reason to only use technology in an appropriate manner during our academic time together. As technology-users, we often lose our senses when it comes to customs of polite behavior, and the result is that perfectly

charming people may become incredibly rude. So, for both these reasons, please turn off your cellphones or set them on silent/vibrate mode when you come to class. It is disrespectful for our activities to be interrupted by a ringing cellphone. Similarly, text messaging will not be tolerated in class. Any student found to be sending or checking text messages during class will be invited to make a choice either to cease the texting or leave the classroom.

Of course, you are welcome to bring your laptop and iPad to class and use them to take notes, access readings and slideshows, etc. You are not welcome to do social networking, check email, or otherwise perform non-class-related activities during our academic time together.

So, this is my best advice: If you are not using it to perform a task specifically related to what we are doing in class at that very moment, please put it away.

Thanks to Dr. C.A Finnegan, University of Illinois at Urbana-Champaign and Dr. M.C. Miller, Harvard Medical School

Students who wish to request accommodations in this class for a disability should contact the staff of the Academic Support Center at 1307 Main Street, or by calling 610-861-1401. Accommodations cannot be provided until authorization is received from the Academic Support Center.

Professor reserves the right to amend this syllabus as the course progresses.

Moravian College Department of Biological Sciences Anatomy and Physiology - BIO 103 Monday Lab Fall 2014

Instructor: Dr. Cecilia M. Fox

Phone: 610-861-1426

Tentative Laboratory Schedule

Week of	Topic
August 25	Homeostasis
	Resting Pulse Rate
September 1	Introduction to Clinical Database
	Searches – Meet outside Reeves Library at 1:15pm
	Organs, Systems and Organization
	of the Body
September 8	Microscopy
·	Cell Structure and Function
	Cell Transport and Permeability
September 15	Tissues
September 22	Tissues (continued)
	Integumentary System
Sept. 29	Skeletal System
•	Case Study Presentations 1

October 6 Skeletal System (continued)

Articulations

Case Study Presentations 2

October 13 No Lab – Fall Break

October 20 Practical Exam #1

October 27 Muscular System-Human

Cat Dissection

November 3 Muscular System (continued)

November 10 Histology of Nervous Tissue

Nerve Physiology

Case Study Presentations 3

November 17 No Lab – Society for Neuroscience Conference

November 24 Dissection of Sheep Brain

Reflex and Sensory Testing

December 1 Practical Exam # 2

Students who wish to request accommodations in this class for a disability should contact the staff of the Academic Support Center at 1307 Main Street, or by calling 610-861-1510. Accommodations cannot be provided until authorization is received from the Academic Support Center.
