English 261 Prophets of Doom and Gloom?:
Science Fiction, Science Fact, and the Contemporary World

I. Although creators of science fiction are often recognized for their predictions of events and technological developments, more important has been their role as prophets and their dire warnings about the dangers of the stark shape of the world to come, a world in which science and technology may very well undermine human values. Many believe that this process is already well under way. The purpose of this course is to gain an understanding of the scientific and technological innovations that define and shape our world and study writers such as Huxley, Orwell, Vonnegut, and others as well as significant sci-fi films to comprehend the nature of their warnings and attempt to formulate a humane and civilized response to the forces shaping and, in many cases, afflicting the contemporary world.

The essence of this course is not a mere comparison of the predictions of sci-fi writers and the reality of the contemporary world but an exploration of the world envisioned by some of the great minds of science fiction and the world in which we actually live. On the one hand, we may discover that the situation is not as dire as we have been led to believe. On the other, we may discover that some of the darker visions of these creative artists are all too real, and our task is to discover what we can do to mitigate and even avert these dark visions.

Although science fiction writers explore many areas of investigation, on earth and in the heavens, and many types of interrelationships among varieties of beings, the focus here will be those areas of science and technology that have direct influence on contemporary life. This course will focus on the following eleven topics or subjects*:

- (1) The Miracles of Modern Medicine: I never met a cyborg I didn't like.
- (2) Artificial Reproduction: Taking the guesswork, and maybe the fun, out of making babies.
- (3) Modern Media I: From the wireless to the wi-fi.
- (4) Modern Media II: The computer—modern marvel or H.A.L.'s revenge.
- (5) Automation: Does a robot take coffee breaks?
- (6) Civil Liberties (including Privacy): Big Brother is watching (& maybe listening too!)
- (7) Globalization: The global village and its discontents—is the world really flat?

- (8) Ecology & Global Warming; Is the “silent spring” screaming at us already?
- (9) Energy: When will the oil run out?
- (10) Memory and the Brain: What do you hear from your head?
- (11) The Nuclear Age: Hope for the future or the Ultimate (and Final) High?

*Students are welcome to suggest other topics not covered among the eleven identified above (such as terrorism) as long as such topics have a direct connection to contemporary science and technology.

II. Students will read science fiction short stories and novels and view science fiction movies to determine what creators of science fiction prophesied about the contemporary world. Through readings and class lectures, some by guest experts, students will gain background and understanding of contemporary science and technology. They will attempt to get to the essence of the works studied and measure how close these creators have come to describing the world in which we live and how we might respond to the challenges they present in their works.

III. For appropriate participation and credit, students must:

- a. read and view** the assigned works, participate in class discussions, and participate in three graded panel presentations—one interpreting a sc-fi novel, one interpreting a film, and one on some aspect of contemporary life as it relates to the works of science fiction;

- **all films will be available on a Blackboard course shell, and can be viewed at the convenience of the student.

- b. maintain a journal of twenty pages on material related to aspects of the course. The journal will be collected and graded during the term;

- c. take two essay examinations, a mid-term written outside of class on a selected aspect of science and technology, and a final written in class on an original interpretation of one or more short story, novel or film. The outline for this examination is prepared in advance;

- d. write one five page term paper on some aspect of contemporary life as it relates to the works of science fiction, as you identify and understand it.

IV. The grade for the course will be determined by a formula that includes the papers and the oral presentations, as follows: three panels, 14% each, journal, and paper, 13% each. The mid-term and final, 15% each, and the two evaluations, 1% each—see below.

V. Attendance policy for English 291 is based upon the attendance statement in the Moravian College Catalog. Read, sign, and submit the attendance contract.

VI. All students are expected to adhere to the revised policy on Academic Honesty that appears in the Student Handbook and Moravian College Catalog.

VII. All students will be expected to attend the Fall Convocation, Thursday, 9/11 — Cohen Keynote Speaker: Jody Williams, Nobel Prize Winner, on this year's theme of War & Peace; Johnston Hall 10 AM—classes excused. Write a brief (no more than one page) evaluation of the lecture.

VIII. All students are expected to view Earth 2100, an ABC TV program on the environmental future of the earth and write a brief evaluation of the program. Earth 2100 will also be on the Blackboard shell.

IX. Course Films and Texts:

1. Preliminary Works, Selected Stories (distributed) & Film:
 - a. Ray Bradbury, "There Will Come The Soft Rains," 1950
 - b. Kurt Vonnegut, Jr. "EPICAC," 1950
 - c. Harlan Ellison, "I Have No Mouth, And I Must Scream," 1967
 - d. Joanna Russ, "When It Changed," 1972
 - e. Film: METROPOLIS, 1927
2. Novels:
 1. Huxley, Aldous BRAVE NEW WORLD, 1932
 2. Orwell, George 1984, 1949
 3. Dick, Philip K, DO ANDROIDS DREAM OF ELECTRIC SHEEP, 1968
 4. Vonnegut, Kurt, Jr. BREAKFAST OF CHAMPIONS, 1973
 5. Gibson, William NEUROMANCER, 1984
 6. Atwood, Margaret ORYX AND CRAKE, 2003
3. Films:
 - a. DR, STRANGELOVE, 1964
 - b. SECONDS, 1966
 - c. SLEEPER, 1973
 - d. NETWORK, 1976
 - e. ROAD WARRIOR, 1982
 - f. BRAZIL, 1985

- 41. W Dc 3 Discussion of Jody Williams, lecture and summing up
- 40. F Dc 6 Summing up and course evaluation forms.

OUTCOMES FOR ENGLISH 291 PROPHETS OF DOOM & GLOOM?

At the conclusion of English 291 the student should be able to

- Provide a basic definition of science fiction and understand the fundamental artistic and philosophical impulses behind its creation;
- Have a fundamental understanding of the effect of science and technology on the contemporary world;
- Provide a basic definition of futurism and understand how the futurist can be distinguished from the creator of science fiction;
- Demonstrate an ability to understand works of science fiction as literary or cinematic works;
- Have a fundamental knowledge of the variety and breadth of critical and philosophical works that analyze and interpret works of science fiction as well as the influence of science and technology on contemporary life;
- Demonstrate competence in participating in and working well with others in panel presentations, preparing effective oral and written analyses, and demonstrate competence in other writing assignments, such as journaling.

“Students who wish to request accommodations in this class for a disability should contact Elaine Mara, assistant director of learning services for academic and disability support at 1307 Main Street, or by calling 610-861-1510. Accommodations cannot be provided until authorization is received from the Academic Support Center.”

In preparation for creating an English Major Portfolio in your senior capstone seminar, please save both digital and hard copies of your work for this class, including drafts with peer and instructor comments.

Dr. George S. Diamond
English 261: Prophets of Doom and Gloom?

August 25, 2014

The Journal

The Journal for English 261 is due at my office, in hard copy Monday November 17th. It should be composed of a minimum of twenty items, on twenty pages or more, each item numbered and each item dated. The purpose is to get you to think about the subject matter of the course—Science Fiction, Science Fact, and the Contemporary World. Do not try to rehash material we have gone over in class, but look at the world around you and think about the implications of science and technology and how it is or might be significant. Subjects for your entries might come in the following ways: thoughtful responses to works of science fiction, contemporary science and technology, or futuristic speculation you might encounter in books, films, television shows, other media, magazines, newspapers, or college classes. Subjects for your entries might also come from personal experiences which are engaging or significant enough to discuss. What is being requested here is not simply a plot summary for the latest disaster movie, for example, but a brief but intelligent discussion of the significance of your subject. The journal should be written in the first person, and, although, substance of response is more important than elegance of language, at the very least, read over each entry to make certain it is coherent and use the spell checker for, at least, a nominal correction of misspelled words. You will not be penalized for grammar or spelling; however, entries should be intelligible. The grade for the journal will be based on the variety of your entries and the intensity and substance you bring to your discussions.
