Course Description:

A course which applies nursing knowledge, interventions and attitudes for vulnerable populations challenged by acute and chronic alterations in physical and mental health. Students analyze responses to mental health crises and episodic interruptions of health, and experience collaborative health care delivery in a variety of settings.

Program Philosophy:

The philosophy of the nursing program evolves from the missions of Moravian College and supports the College's quality values of learning, collaboration, compassion and personal faith. The philosophy can be found in the student handbook in detail by following this link: <http://home.moravian.edu/public/nursing/handbooks/2014-2016/Section%202/Section%20II-Nsg%20Program%20Philosophy%20FINAL%207%202014.pdf>

Ethos Statement:

Grounded in local and global partnerships, nursing at Moravian blends compassionate art with scientific inquiry to achieve a transformative education deeply rooted in a rich liberal arts tradition. At its core the program seeks to develop students who are acutely aware of the world in which they live and their responsibilities of living in a global, inter-dependent community. The program cultivates a professional nurse graduate who values lifelong learning and service to others within a framework of social justice.

The Commission on Collegiate Nursing Education accredits the Moravian College's nursing program. As part of the accreditation process the program must provide evidence of assignments completed by students. Any of the methods of evaluation used in this course may be used as evidence of student assignments during the accreditation process.

Course Objectives:

1. Synthesize knowledge from the humanities, sciences, public health, ethics and nursing theory as a basis for determining and prioritizing health needs of challenged populations across the life span.
2. Collaborate with community and health care team members to foster optimal health of individuals, families and communities.
3. Utilize nursing roles in planning, providing, and evaluating evidence-based safe, quality care for clients across the life span in a variety of settings and clinical partnerships

4. Address cultural and spiritual concerns in providing holistic care to individuals, families, and communities.
5. Demonstrate leadership and professional accountability in partnership and care provision in a variety of settings.

Prerequisites: All required sciences; all required nursing courses

Co-requisites: NURS 313

Required Textbooks:

Other required technology:

BlackBoard® (BB)-Each student must enroll in the course on our course-specific virtual classroom.

Course Requirements:

1. Nursing Department Attendance Policy

Classroom attendance is necessary to promote the learning of the theoretical component of the curriculum and to enrich and expand the application of the clinical learning process. Students are expected to attend all classroom activities. An instructor may lower a student's grade because of a class absence. If absences occur, it is the student's responsibility to make up whatever work has been missed. Permission to make up assignments, quizzes, and periodic tests may be granted at the discretion of the instructor. Authorization to make up a final examination is given only by the Office of Academic Affairs.

Clinical attendance is mandatory for the student to consistently demonstrate the ability to meet course objectives. It is the student's responsibility to notify the appropriate person(s) as identified by course faculty in the event that he/she is unable to attend clinical experiences. Such notification is to occur up to two hours prior to the scheduled clinical experience. If a student is absent from class/clinical activity due to illness, a health care provider's statement verifying the illness and certifying that the student is able to resume class or clinical activity may be required.

All clinical absences will be tracked in a database for review by future course instructors and the Chairperson of the Department of Nursing. Students who request time off from clinical, due to events in which they have no control (death of a family member), will contact the course faculty and the clinical instructor, and the determination for clinical makeup will be decided. Students who arrive to clinical practice late or leave early may be required to make up those cumulative minutes at the end of the semester on a clinical makeup day. It is up to the discretion of the course faculty to require clinical makeup for students who routinely leave clinical early due to co-curricular activities. For student involved in co-curricular activities such as sports or music, etc. schedules must be submitted to clinical faculty at the beginning of the semester so that clinical experiences can be appropriately determined.

Students will be required to makeup clinical absences. **The designated clinical makeup day is Saturday, December 12. It is mandatory that students requiring clinical makeup attend this day. Because this is a both reading day and a Christmas Vespers day, please plan your schedules accordingly.** Students will be charged \$250.00 per day of clinical make-up to

reimburse the department for clinical supervision and administrative fees. All clinical requirements, including make-up, must be completed by the end of the final examination period for that semester. Any associated fees must be paid in full by the end of the final examination period for that semester. Students are exempt from clinical make-up if they are attending a faculty approved conference (i.e.-NSNA or SNAP convention). In the event that a student receives an excused absence for a required educational trip and later in the semester incurs more clinical absences, the student may be in a position to consider withdrawal from the course, if the clinical experiences absences are too numerous to be made up within the available faculty contract time.

In the event of a protracted illness requiring multiple missed clinical days, the student, course instructor(s), and Chairperson will meet to discuss alternatives and develop an individual education plan.

2. Nurs 315 Class Attendance: Students are expected to be prepared and attend all class meetings. This includes completing assignments prior to attending class. Tardiness is a distraction to the class and will not be tolerated. Attendance, tardiness, and participation will be assessed and will be reflected in the Attendance/Participation grade.

If unable to attend a class, please contact the course faculty via email or phone. Students are responsible for providing a doctor/nurse practitioner/health center excuse for an excused absence. Students are responsible for obtaining any notes, handouts, or other class items from classmates.

3. Academic Honesty:

Honesty and integrity are expectations of professional nurses. Therefore, these behaviors are expected in both clinical and classroom environments in your performance as a student. Examples of academic dishonesty include, but are not limited to: plagiarism, looking at another's test or quiz, positioning your paper so that others can see the answers on a test or quiz, text messaging test/quiz answers, substituting another's work as your own, photographing exams and taking screen shots of on-line quizzes, focused reviews or on-line exams.

Plagiarism is the intentional use of another's words or ideas as your own. This can range from using another individual's direct words or changing the words slightly (paraphrasing) without the appropriate citation to purchasing a paper from the Internet or a professional writing service. Refer to the Moravian College Academic Honesty Policy in the Student Handbook. Consequences of academic dishonesty include a failing grade on the exam or assignment, and possible failure of the course or dismissal from the nursing program.

4. Accommodations for learning and other disabilities:

Students who wish to request accommodations in this class for a disability must contact Ms. Elaine Mara, assistant director of academic and disability support, at the lower level of Monocacy Hall, or by calling [610-861-1401](tel:610-861-1401). Accommodations cannot be provided until authorization is received from the Academic Support Center.

Students who wish to request accommodations for support of other disabilities should contact Dr. Ron Kline, Director of the Counseling Center (ext. 1510).

5. All examinations are to be taken at the scheduled time. Any individual who is not at the scheduled examination based on a claim of illness is required to provide appropriate medical documentation of a valid medical reason for absence. An alternate examination may be determined by the course faculty. **The Final Exam, per Moravian College policy, must be taken at the appointed time.**

6. Completion and satisfactory achievement of all course objectives and written assignments in the laboratory and clinical settings, and curriculum requirements including standardized assessment tests (Kaplan Psychosocial Nursing Exam).

7. Learning activities stated on the topical outline section of this syllabus are to be completed prior to class time. The student can expect to work approximately 10-12 hours per week in preparing for this class.

8. Demonstrate expected professional behavior and appearance when in the classroom and clinical laboratory (both uniform and street clothing).

9. Maintenance of confidentiality for all assigned patients or clients as required by law (HIPAA). Students will be required to read and know agency policies on confidentiality and may be required to sign agency forms on confidentiality.

10. Students are reminded of the importance of respect and courtesy toward others. As a courtesy to your colleagues, phones must be in the silent mode during class. Texting or use of cell phones for Internet access during class is unacceptable. Students are expected to be respectful of the time of both faculty and their peer group. Thus, if you are unable to keep an appointment with a faculty member or student peer related to course work/group projects, please be courteous and notify others of your need to cancel or reschedule the appointment.

Methods of Evaluation:

1. Reaction Paper	10%
2. Participation	5%
3. Mental Health assignments/quizzes	6%
4. Partnership Presentation	5%
5. Community health assignments/quizzes	4%
6. Exams (3)	45% (15%; 15%; 15%)

Note: Kaplan Focused Reviews: Incentive points** added to exams 1,2,3

7. Cumulative Final Exam	15%
8. Kaplan testing (see Kaplan Assessment policy)	10%

Total 100%

Grading Policy:

Assignments are expected on or before their due date both for class and clinical. **If class assignments are submitted late, five points per day will be deducted from the grade.** Where applicable, class assignments are to be typed and submitted according to APA style (6th edition). The grading scale is as follows:

A = 93-100	B- = 80-82.99	D+ = 67-69.99
A- = 90-92.99	C+ = 77-79.99	D = 63-66.99
B+ = 87-89.99	C = 73-76.99	D- = 60-62.99
B = 83-86.99	C- = 70-72.99	F = 59.99 and below

Please note that it within the instructor’s purview to apply qualitative judgment in determining grades for any assignments and for the course final grade.

Kaplan Assessment Policy

The nursing department has incorporated a comprehensive assessment and review program into the curriculum in order to systematically strengthen the knowledge base of nursing students which may result in a more competent, successful practitioner. This program consists of a variety of learning methods: written materials, videos, online practice and proctored assessments. All of these materials are designed to promote learning throughout the course of study. For example, students will begin receiving Kaplan materials with their first clinical nursing course and will continue to receive materials each semester thereafter to augment content learned in that semester.

Proctored assessments are placed within specific nursing courses, and count for 10% of the student’s final grade in the course. Students are encouraged to prepare for this proctored assessment by reviewing printed materials, appropriate DVDs and focused tests prior to taking the proctored assessments. By so doing, students should be successful on the proctored assessment(s) offered towards the end of the course, typically week 13 or 14 for TUG program and week 6 or 9 for PB program, depending on the PB semester length. (i.e. a 7 week PB semester means the assessment(s) will take place in week 6, and 10 week PB semester means the assessment(s) will take place in week 9).

Students will receive an individual score with a percentile ranking. A minimal percentile ranking of 50% is the benchmark set by the nursing faculty. The following table outlines the course grade based on percentile ranking:

Percentile Ranking	Kaplan Exam Course grade
90-99 th	98
80-89	95
70-79	90
60-69	86
50-59	82
40-49	74
30-39	66
20-29	58
10-19	50
Below 10	40

Remediation:

Remediation is required for **all** students following the completion of each Kaplan assessment. Even students who score in a high percentile ranking are required to remediate; many times, additional learning can take place during remediation. Faculty will set a date for completion of remediation. The faculty requires 2 minutes of remediation for each and every question (correct

and incorrect) on a Kaplan assessment. Students who meet the benchmark for remediation will have 2 points added to their Kaplan exam course grade. Students who do not remediate as specified earn a zero on the Kaplan exam course grade, regardless of original score.

****Kaplan Focused Review Incentive Points**

There are three Kaplan Focused Reviews (FR) for the psych/mental health curriculum. Completion and remediation of each FR is required and will give added points to exams. FR's must be taken at the times designated on the syllabus or no credit will be given.

Credit/Incentive points for the FR will be computed as follows:

After completing each 30 question FR, the student must remediate for a minimum of TWO minutes per question. After 48 hours, the student may elect to retake the FR.

The scores from the two attempts for a FR will be added and converted to a % (maximum = 2%).

EXAMPLE: FR #1: first score: 80 second score: 90
Total = 170, which is converted to 1.7%; this percent is added to the exam 1 score.

FR #2 and 3 will be computed in a similar manner, with incentive points added to exam #2 and #3.

Students must work independently on their FR; collaboration with other students during testing is not allowed. Failure to remediate for the specified amount of time will result in a zero for the assignment.

Clinical Learning:

Students are required to earn a *Satisfactory* clinical evaluation in each nursing course in order to progress in the curriculum. Failure to earn a *Satisfactory* clinical evaluation will result in a grade of "F" in the course. Students are expected to adhere to the policies and procedures of the clinical agencies in which they are assigned.

St Luke's University Hospital policy on piercings and tattoos includes the following:

The only acceptable visible piercings are ear piercings.

Tattoos must be covered.

If a student is at St. Luke's for clinical and a tattoo is visible, the student will be sent off clinical.

The student must pay for a makeup experience. If the student has a second infraction, he/she may not go back to that unit, which translates to a clinical failure.

Nursing 315 Topical Outline

Please note while the instructor will try to hold to the flow of the course outline, it may change over the course of the semester. Students will receive notification of syllabus changes in class or through electronic communication.
